

My personal reflections on the finish workshop:

- Houses are perceived inside out
- Peace, nature and privacy is very important
- Do it yourself is prestigious
- Sauna, fireplace, warmth

The ideas I find particularly inspiring:

- Convertible interior
- Use the 3rd dimension for lifting things up
- Move the systems outside the house
- Intelligently surfaces changing temperature, light etc
- The house should understand you
- Multi functionality – “Swiss army knife”
- Self fixing house
- District everything (district beer)
- Round shapes tells beautifully about the light
- Maslow pyramid
- Play with water inside the house
- Personal acoustic environment

Consequence for Adaptable house

- Plug&Play should include “self assembly”
- Professional building envelope with accessible utilities
- Self assembly interior with 3D multi functionality
- Water (fountains, basins) - fire (hot shower, warm inside, sauna fireplace) – natural daylight
